LET'S TALK INLAND RAIL

TOTTENHAM TO ALBURY PROJECT

We're keen to let you know where we are at with planning in Victoria for Inland Rail – Australia's largest rail freight project.

This project will see the lowering of tracks or changes to bridges at more than two dozen locations along the 306km alignment to accommodate double stack freight trains to run on the track.

One of these sites is the Broadford-Wandong Road bridge in Wandong – which we are proposing to replace with a newer, safer but higher bridge.

Come talk with us about our design thinking and what this may mean for you and your community.

Date: Saturday 10 November, 2018

Time: 11.00 am – 1.00 pm

Venue: Wandong Public Hall, 19 Rail Street, Wandong
