

NATURAL GAS CONNECTION WORK BEGINS

Excavation works have commenced in late January 2015 at various locations across the Wandong-Heathcote Junction Township, as part of the agreement between the Victorian Government (Regional Development Victoria) and Australian Gas Networks to connect Wandong-Heathcote Junction to the State's natural gas network by 2017.

These works are required to assist with the planning and selection of alignment for the new gas mains and are expected to be completed by the end of February 2015. Residents and businesses affected by the works will receive further notification prior to the works commencing.
