

WANDONG - HEATHCOTE JUNCTION NATURAL GAS PIPEWORK ALMOST COMPLETE - OCTOBER 2016

At the end of September Zinfra crews will be finishing the laying of the gas pipework required to bring natural gas to Heathcote-Wandong Junction.

The crews will still be seen around town as they tidy up and complete the final pieces of work including the linking up of areas, commissioning of the pipes, and works at and around the City Gate site.

The installation of services to homes will commence in the coming weeks.

Zinfra is delivering the works for APA Group, on behalf of Australian Gas Networks, owners of the gas network. Residents planning to connect to natural gas are encouraged to apply for a service line with their preferred energy retailer now.

or telephone (03) 9463 8419.

NATURAL GAS—TWO KILOMETRES TO GO – SEPTEMBER 2016

During the month of August Zinfra crews continued the works required to bring natural gas to Wandong-Heathcote Junction. Approximately 83% of the gas mains have now been laid (9,800m), leaving just two kilometres to go. The City Gate works in Junction Road are approximately 90% complete with a possible completion date of mid-October 2016.

Planning has now begun for the next stage of the project, which involves laying the services from the gas main to the individual residential and commercial properties, in preparation for gas meter installation.

Property owners who have made an application for gas will be contacted by a Zinfra representative to make an appointment to visit the property. The purpose of the visit is to determine the best location for the gas meter.

Zinfra is delivering the works for APA Group, on behalf of Australian Gas Networks, owners of the gas network. Residents planning to connect to natural gas are encouraged to apply for a service line with their preferred energy retailer now.

NATURAL GAS PROJECT PROGRESSING WELL – AUGUST 2016

Work required to bring natural gas to Wandong-Heathcote Junction is progressing well. At the end of July, Zinfra had finished laying nearly eight kilometres of reticulation mains throughout town. Of the three stages of work, the first stage is complete, the second stage is nearing completion and Stage 3 is well underway.

Additionally, gas supply pipework is being installed at the local gas city gate. A „city gate“ has an important role in the natural gas distribution network, as it is the point where gas leaves the long distance transportation system for the lower pressure systems of local distribution companies, who then deliver the gas directly to your home or business.

Zinfra is delivering the works for APA Group, on behalf of Australian Gas Networks, owners of the gas network. Residents planning to connect to natural gas are encouraged to apply for a service line with their preferred energy retailer now. For more information visit www.naturalgasinwhj.com.au.

NATURAL GAS IN WANDONG - HEATHCOTE JUNCTION BECOMING A REALITY – JULY 2016

The Zinfra crew has made good progress on the work required to bring natural gas to Wandong - Heathcote Junction. The team has been digging and drilling in Heathcote Junction streets and has now completed stage one of the reticulation works required as part of this three stage project. Works have also continued into stage two, and part of stage three is also complete. To date the crew has laid approximately 5,800 metres of reticulation mains which is 50% of the current requirements of the project. Zinfra is delivering the works for APA Group, on behalf of Australian Gas Networks, owners of the gas network

NATURAL GAS IN WANDONG - HEATHCOTE JUNCTION BECOMING A REALITY - June 2016

For the past month a crew of eight from contracting company Zinfra has been digging and drilling in Heathcote Junction streets installing Stage 1 of three stages to bring natural gas to Wandong - Heathcote Junction. Zinfra is delivering the works for APA Group, on behalf of Australian Gas Networks, owners of the gas network. Pictured is the team working in Range Avenue. Horizontal directional drilling is used to bore holes to connect pits dug at around 100-metre intervals, then 100 metres of gas piping is pulled back through the drilled holes. This method leaves the street largely unscathed. Weather permitting Zinfra hopes to have the works in Heathcote Junction streets (Eucalypt, Messmate, Range, View, Station, part of North Mountain, part of Rail) completed by mid- June. Residents planning to connect to natural gas are encouraged to apply for a service line with their preferred energy retailer now. For more information visit www.naturalgasinwhj.com.au.

Wandong—Heathcote Junction Natural Gas Project

Earlier:

Australian Gas Networks will be expanding their natural gas network to include Wandong Heathcote Junction. The city gate will be constructed in April 2016 and the first house connected to natural gas is anticipated to be mid 2016.

If you have any enquiry regarding the natural gas roll out and connection you can contact:

Michael Llewelyn, State Marketing Representative (Vic)

on email <micheal.llewelyn@apa.com.au> or telephone (03) 9463 8419.
