

Wandong Primary School

Hello Wandong community! To say term two, 2020 has been eventful is one of the biggest understatement of the century. Our school community has truly banded together to put the health and wellbeing of our students front and centre.

It has been wonderful to end term two with a full cohort of students, after welcoming back our grade three – six students mid-June. It has been wonderful to see our students embrace many of the changes put in place for their health and safety and new routines have now become common place.

On their return, students were warmly welcomed back to their classrooms and participated in sessions with a strong focus on wellbeing and mental health.

As we say our farewell to term two, we look excitedly towards term three and four. It has been wonderful to hear that our school camps program will not be interrupted and information has been sent out to families accordingly. In addition, we will be taking a small group of students to the annual 'Kids Teaching Kids' conference in Melbourne. Here we will see the projects other schools have undertaken this year with the aim of completing and presenting our own sustainability project in 2021.

In term three Wandong Primary School will be undertaking a whole school review with the Education Department. The review will give the school a chance to reflect on the journey it has been on and create goals for the future. We look forward to entering this time with a growth mindset, proud of the journey we have travelled and excited about possible new directions.

As restrictions continue to ease, we will begin our transition to school sessions for incoming Foundation students. We look forward to meeting the newest members of our school community. Please stay tuned to the official school Facebook group and website for up to date information.

Keep smiling J
